LOWER YOUR HEATING AND COOLING COSTS

Smart Thermostat Program

ENERGYWISESM
Use less. Spend less. Do more.

Most Nebraska homes use around half their energy for heating and cooling.

This includes all energies such as electricity, natural gas, and propane. According to a Nebraska energy burden study, the average Nebraska household spends more than \$2,400 for the energy needed to run their home. What if you could reduce your heating and cooling needs by up to ten percent while helping to automate your home?

Now consider: The EnergyWiseSM Smart Thermostat Program. If you have a home Wi-Fi connection and a central air-conditioning or heat pump system, you may qualify for an EnergyWiseSM incentive of up to \$100 for installing a qualifying smart thermostat.

Smart thermostat technology is most beneficial for households that have extended periods during the day when no one is home, those that turn their thermostat down during bedtime hours, or those that have irregular occupancy through the week, month or year.

Where do you start?

- Check with your local electric utility for eligibility. A list of eligible smart thermostats can be found at: www.energystar.gov/productfinder/product/certified-connected-thermostats/results.
- Confirm your home's HVAC system is compatible with the selected thermostat. Residential applicants only.
- Install the thermostat (professional installation is recommended) and ensure an operative Wi-Fi connection.
- Complete and submit incentive application with proof-of-purchase to your local electric utility. If professionally installed, submit copy of your contractor's invoice.

SMART THERMOSTAT APPLICATION

Applications will only be processed if fully completed and signed. Once completed, submit with proof of purchase (thermostat must be ENERGY STAR[®] certified), to your local electric utility. Contact your utility with any questions.

- Select One**
- \$100 - Primarily Electric Heat** (Professionally Installed)
 - Up to \$75 - Primarily Electric Heat** (Customer Installed)*
 - \$50 - Primarily Fossil-Fuel Heat** (Professionally Installed)
 - Up to \$25 - Primarily Fossil-Fuel Heat** (Customer Installed)*
- *Customer installed limited to 50% of purchase price (before sales tax and shipping)*

1. Customer Information
